time step, T = 0.2 s
relative error vs Richardson reference
time step dt (s)
stress at T (p = 1.00)
content at T (p = 0.99)
flux at T (p = 0.96)
order 1
time step, T = 2 s
relative error vs Richardson reference
time step dt (s)
stress at T (p = 0.99)
content at T (p = 0.84)
flux at T (p = 1.00)
order 1
