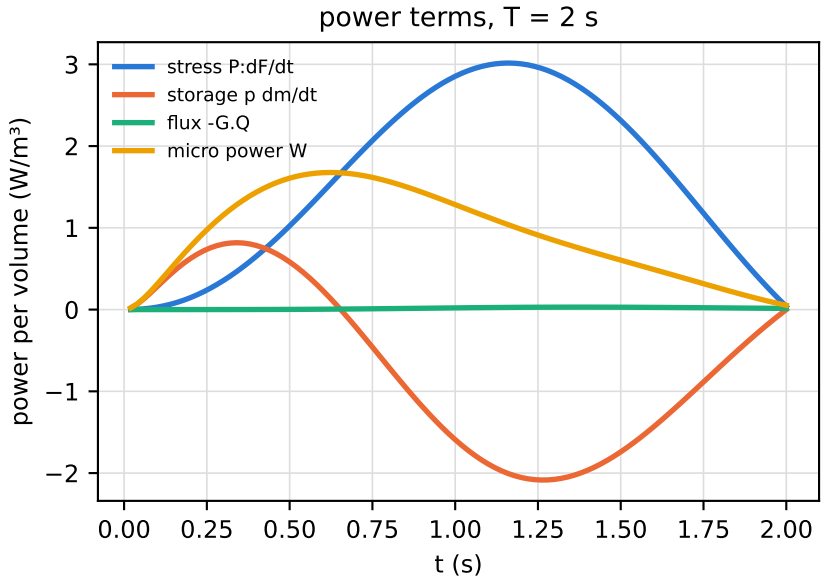
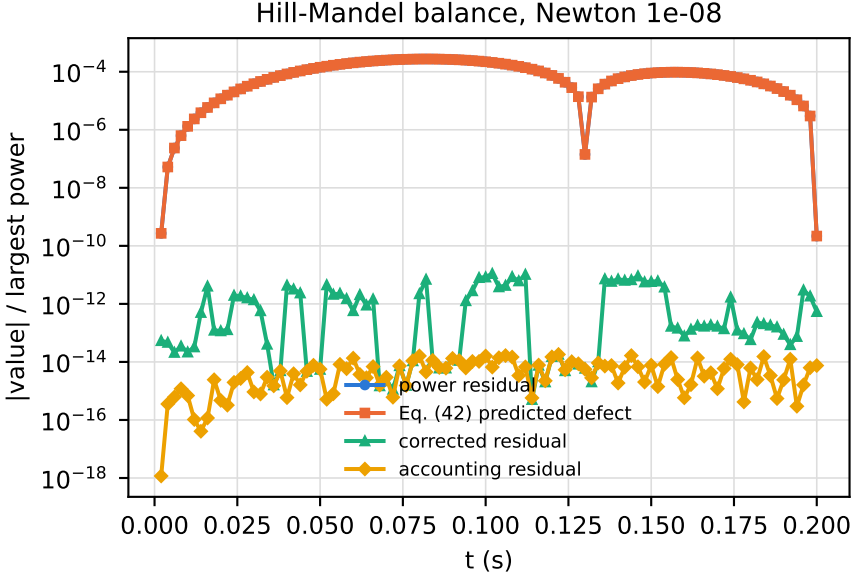
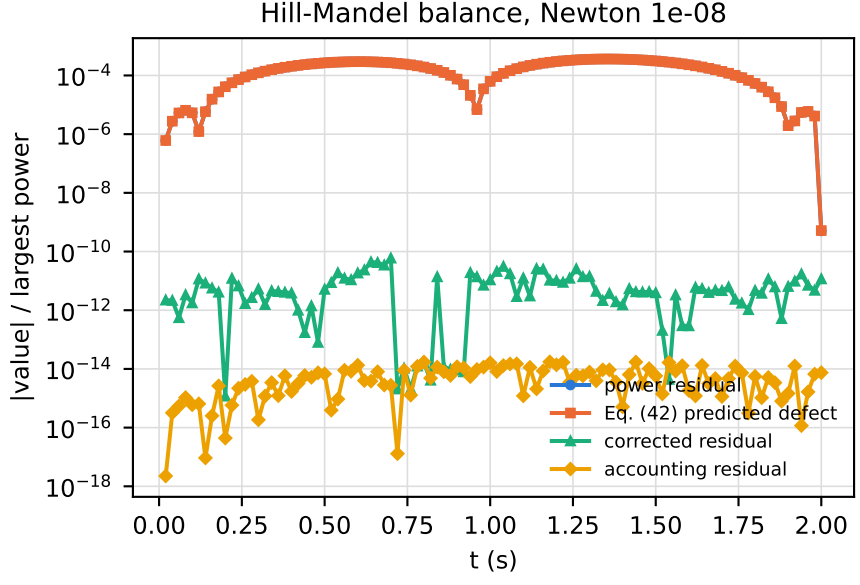
power terms, T = 0.2 s
stress P:dF/dt
storage p dm/dt
flux -G.Q
micro power W
power per volume (W/m³)
t (s)



power terms, T = 2 s
stress P:dF/dt
storage p dm/dt
flux -G.Q
micro power W
power per volume (W/m³)
t (s)



Hill-Mandel balance, Newton 1e-08
|value| / largest power
power residual
Eq. (42) predicted defect
corrected residual
accounting residual
t (s)



Hill-Mandel balance, Newton 1e-08
|value| / largest power
power residual
Eq. (42) predicted defect
corrected residual
accounting residual
t (s)
